## Elm Leaf Beetle (ELB) Season 2025 - 2026

SHAE Enterprises has been investigating Avenue of Honours and significant Elm trees in the Central Highlands, Victoria.

Historic damage to trees from incorrect treatment methods that has resulted in fungal and bacterial infection of trees, causing some trees to have a reduced life expectancy.

This is a disappointing outcome as Victoria has some of last Elm tree Avenues in the world and we must protect this precious genetic pool.

Contact SHAE Enterprises for more information and better options to manage your important Elm trees.
